Meeting to discuss Halewili Road main replacement project set for Dec. 23

KALAHEO – The Department of Water (DOW) will hold a public information meeting to discuss a new water main replacement project along Halewili Road and Kaumualii Highway, in Kalaheo.

The meeting will be held on Wednesday, Dec. 23, 5 p.m., at Kalaheo Neighborhood Center.

“This project will improve the service area near Brydeswood subdivision,” said Dustin Moises, DOW’s construction project management officer. “The current transmission line was damaged a few years ago and exposed maintenance problems that we will address with this project. We encourage the community to attend this meeting and discuss any questions or concerns with our construction team, which consists of DOW staff and our contractor, Kaiwa Construction Inc.”

The Halewili Road main replacement project is part of the DOW’s Water Plan 2020. Work will include replacing aging waterlines and installing appurtenances including connections to existing waterlines, new valves, a new fire hydrant, and other restoration and repaving work.

Work will begin in mid-January 2016, with anticipated completion in October 2016.

Nearby residents will be notified of construction equipment and vehicles that will be in the area for the duration of the project. A detailed map of the area can be found on the DOW’s website, www.kauaiwater.org.

Auxiliary aids, services and materials in an alternate format are available upon request and should be made no later than five working days prior to the meeting.

To request these services or for more information please call the Department of Water at 245-5455.
